Austin, Texas

Anthony Coffey

SENIOR FULL STACK SOFTWARE ENGINEER

INTRODUCTION

Senior Full Stack Engineer with 12+ years of experience architecting high-scale cloud platforms, AI/ML features, and regulatory-compliant healthcare applications. Proven track record leading SOC 2 and HIPAA compliance implementations, supporting FDA 510(k) submissions, and deploying production AI integrations on AWS and Google Cloud. Expert in full-stack TypeScript and Python, cloud-native/serverless architecture, and AI-assisted development with coding agents such as Claude Code and Cursor.

WORK HISTORY

Full Stack Software Engineer | **Bitmotive, LLC** | CONTRACT *Feb 2026 – Aug 2026*

- Built the HIPAA and SOC 2 compliance layer for a multi-tenant prenatal ultrasound AI platform (React, Python/FastAPI, AWS): multi-factor authentication, audit logging on every patient-data endpoint, and immutable archive.
- Built a Python OCR pipeline that detects and redacts patient identifiers burned into DICOM ultrasound frames, with reproducible output for regulatory audit.
- Delivered full-stack localization across a React frontend and Python backend adding support for English, Spanish, and Portuguese.

Lead Software Engineer | **24hrcarunlocking.com** | FULL-TIME *Aug 2023 – May 2026*

- Cut roughly \$6,700 in annual infrastructure costs by migrating the company off Heroku and dedicated WordPress hosting to a static Astro site with React components for the booking forms, hosted on Cloudflare's free tier, restoring lost organic traffic and reaching 99+ PageSpeed scores.
- Architected a serverless, multi-tenant SaaS web and cross-platform mobile application on Google Firebase using React, Capacitor, Firestore and Firebase Functions, with a GitHub Actions CI/CD pipeline that runs unit tests on every push before deploying.

Staff Engineer | **Southern Made** | CONTRACT *Apr 2024 – Sep 2024*

- Designed the system architecture for the DORITOS Crash the Super Bowl event on GCP using Google Cloud Vision and Gemini API for automated submissions review.

Full Stack Software Engineer | **Marani Health** | FULL-TIME *Mar 2022 – Apr 2024*

- Developed a React annotation tool, deployed on AWS Amplify, that validated the fetal-maternal heart rate and contraction algorithms behind the company's FDA 510(k) submission.
- Raised test coverage on the signal analysis algorithm in Python from 0% to 99% ahead of FDA 510(k) submission.

WORK HISTORY

Cybersecurity Analyst | **Health Tech Defenders** | CONTRACT *Dec 2023 – Sep 2025*

- Led penetration testing of web applications, APIs, and cloud infrastructure in healthcare systems using Burp Suite, Nmap, Metasploit, and Nikto.
- Authored security assessment reports with risk-ranked findings and remediation guidance for HIPAA-regulated environments.

React Native Developer | **festivalPass** | CONTRACT *Mar 2021 – Apr 2022*

- Developed a cross-platform React Native app with full feature parity to the existing web app, supported by a Node/Strapi backend.
- Managed App Store and Google Play submissions through approval and owned post-launch releases.

Freelance Software Engineer | **Lifecycle Insights** | FREELANCE *Jan 2019 – Jun 2021*

- Architected an interactive survey app in Vue supported by a Node/Express backend with dynamic data visualization and on-demand styled PDF report generation (Highcharts).

Freelance Software Engineer | **Smart Insurance** | FREELANCE *Jun 2016 – Apr 2019*

- Built an end-to-end Workers' Compensation quote application in React with underwriting rules and full compliance with state insurance regulations for all supported states.
- Designed and deployed custom WordPress themes, plugins, and form workflows to integrate third-party data into the underwriting logic.

Full Stack Developer | **RiskPro®** | CONTRACT *Jan 2014 – Jun 2016*

- Core developer on RiskPro Advisor, a fintech portfolio analysis platform, implementing and validating proprietary risk and performance algorithms on a Python backend hosted on AWS.
- Built the Highcharts visualization layer for use in the React app and solved chart injection into generated PDF reports.

EDUCATION

Gulf Coast State College | Associate of Arts *Graduated May 2012*

- C++ I & II, Java I & II, PHP & MySQL
- Planning & Design, Object-Oriented Design, Systems Analysis, Database Management, CompTIA+, Security+, Network+

TECHNICAL SKILLS

Frontend

- React, React Native
- Tailwind
- Next.js, Astro
- Vue.js / Nuxt
- Angular
- Flutter

Backend

- Node, Express.js
- Sanity
- Flask, FastAPI
- PHP, Laravel, WordPress
- NGINX / Apache2
- Contentful
- Strapi
- Linux (Debian, Ubuntu, CentOS)
- System Administration / DBA

Data

- SQL / NoSQL
- PostgreSQL
- MySQL
- SQLite
- Firestore
- MongoDB
- DynamoDB

DevOps, IaC, PaaS, TDD, etc.

- GitHub Actions
- Docker, Kubernetes
- Terraform, Ansible
- Supabase, Heroku
- Auth0
- Vercel, Netlify
- Expo, Capacitor, Electron
- OpenTofu
- CloudFormation
- Cypress, Playwright, Vitest, pytest

Programming Languages

- JavaScript (ES6+) / TypeScript
- Python
- Java
- C / C++
- C#
- Dart

AI/ML

- Claude Code, Cursor, Codex
- Gemini
- OpenAI
- Cloud Vision
- Qdrant
- PyTorch / TensorFlow
- n8n, LangChain
- LiteLLM
- Ollama

Cloud

- IAM, DNS, VM, VPC, Firewall, Storage
- AWS
EC2, ECS/Fargate, RDS, Lambda, S3, Cognito, KMS, Secrets Manager, CodeBuild, CodePipeline, CodeDeploy, Amplify
- Google Cloud
App Engine, Compute Engine, Kubernetes Engine, Firebase, Cloud Run, Cloud Build, Cloud Storage

Security & Compliance

- SOC 2
- HIPAA
- Penetration Testing
(Burp Suite, Nmap, Metasploit, Nikto)
- Application Security
(XSS, CSRF, SQL Injection)
